

**ALPINE TIMING** was founded by Michal Trnka and is based in Tawonga South at the foot of Victorian Alps, combining his passions in IT, sports and outdoors.

Since then we have successfully delivered timing services for many events in various sports, including International and National level events. We have the capacity to time several events in various locations at the same time. We have worked with several organisations including Skiing Australia, Mountain Bike Australia, Cycling Australia, Cycling Victoria, multiple clubs and charities with very positive feedback from both, the race organisers and also the participants. We provide high quality services which comply with international standards. For example several [events timed by us](#) have been scrutinised and approved by [FIS](#) international ski federation or [UCI](#) international cycling federation.

We love what we do and we are driven by the trust that participants (and the event organiser) put into us to provide an accurate, reliable & instant result, that they are expecting from us.
